

# CLANCY GROUP

*Clancy Group is one of the UK's leading utilities and civil engineering contractors. Summit Hygiene supported the head office FM team with the introduction of the Saclo Continuous Liner System, helping Clancy transition to a more efficient and sustainable waste solution.*

## OVERVIEW

Clancy Group approached Summit Hygiene looking for a split-stream bin solution to ensure compliance with the upcoming Simpler Recycling waste legislation, due to come into effect in March 2025. The team were also keen to find a system that would deliver cost savings and support their sustainability goals.

## OUR SOLUTION

Summit Hygiene introduced the Clancy facilities team to Saclo, an innovative continuous liner system designed to reduce plastic, save time, and improve hygiene. A trial of the Saclo 3-stream cabinet was recommended, which was tested onsite over a one-month period. The feedback was overwhelmingly positive; the team found the system easy to use, efficient, and well-suited to their needs.

***"We were looking for a bin system that supported our sustainability goals, and Saclo delivered exactly that. The trial proved how easy the system is to use, and the reduction in plastic waste has been a real win for our team."***

## THE RESULTS

Following the trial's success, Clancy Group decided to purchase Saclo units with a custom bin design and a bespoke backboard, creating a solution that was both functional and fully aligned with the Clancy brand.

01

### Efficiency

The cleaning team found the liner changeover process much faster, allowing them to service more bins in less time.

02

### Eco-friendly

Clancy Group were able to significantly cut plastic usage, supporting their ESG goals and reducing waste sent to landfill.

03

### Hygienic

The hygienic sealed bag change process meant their facilities team had less contact with waste.
